

# Building Safety Act / Gateway 2

## Non-Combustible Facade Systems

Wetherby Wall Systems Ltd | Part of  **ROCKWOOL** Group

# Certified Façade Systems

## What is Gateway 2?

Gateway Two serves as the second key milestone in the Building Safety Act's framework, taking place during the construction phase of higher-risk buildings. It is dedicated to ensuring that the approved design is implemented in practice while meeting all required safety standards and regulations.

## How can we assist you with your Gateway 2 Submission ?

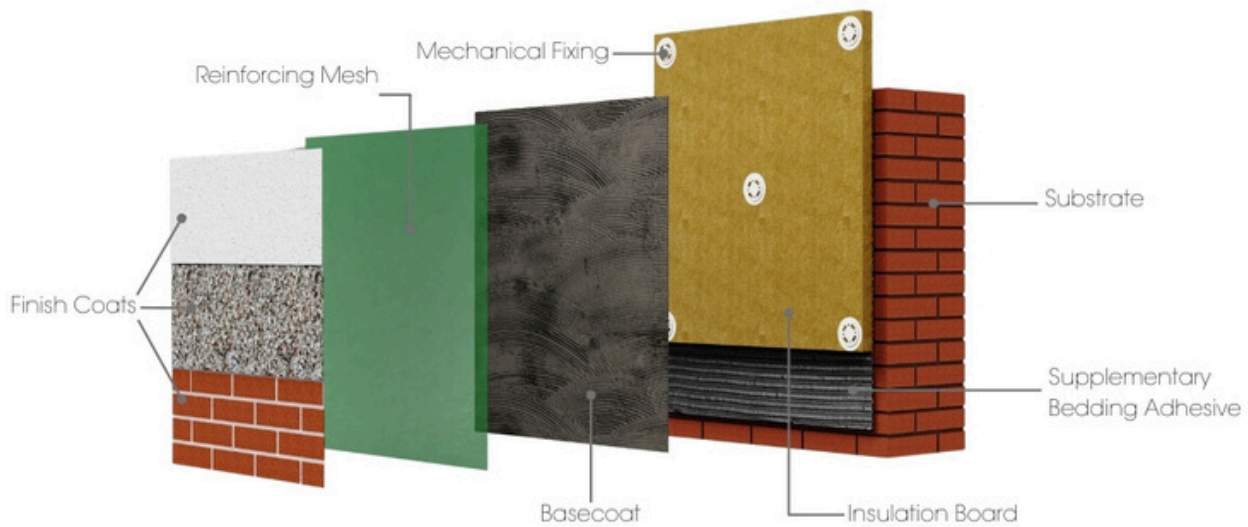

- By offering a combination of Technical Expertise and Technical Support we can contribute to the successful implementation of the Building Safety Act and help ensure safer buildings for all.
- Our technical team is committed to making the Gateway 2 submission process as simple and effective as possible, ensuring compliance while maintaining high standards of safety and quality
- Streamlining the submission of the required technical documents in one pack makes the process more efficient for both the submitting party and the receiving regulatory authority.

# Certified Façade Systems

We have wide range of Non-Combustible External Wall Certified Façade Systems tailored to meet the needs of various building types, along with extensive options of complimenting decorative finishes.
